

CREAM

CARRcrete | InfinityFloor | Cream

Concrete Requirements

Because we remove only a tiny amount of surface material from your concrete, it is imperative that your existing or newly laid concrete slab be flat and smooth with a heavily powerfloated finish; if this is not the the case, please move to our 'Alternative Solution'

Alternative Solution

If your current floor surface is poor or your contractor is not comfortable laying a concrete floor to our specifications, we would recommend a [CARRcrete PROtop Loft](#) layer of 3-4mm thickness which may be applied over a screed or concrete slab to create a fashionable contemporary concrete finish.

Cream Finish

The term cream refers to the stone free creamy material (**Not The Colour**) that forms at the top of a concrete slab when correctly installed and power trowelled.

[CARRcrete InfinityFloor Cream](#) is very popular for industrial looking floors where no aggregates are exposed.

InfinityFloor Cream offers the classy subtle texture produced by the power float during installation with a muted industrial vibe. You can choose a matt, satin or gloss finish, they all have that unique cloudy mix of swirls just a different level of shine.

InfinityFloor Cream is suitable for new concrete floors laid in accordance with our concrete specification or floors laid to industrial flooring standards.

Dependant on the sealer used and the project environment the floor can return to service within hours.

Disclaimer

The information above is given voluntarily and in good faith. It is to the best of our knowledge true and accurate; however it may contain information which is inappropriate under certain conditions of use. The company cannot accept responsibility for any loss, damage, cracking or delamination due to inappropriate use and/or surface preparation, or the possibility of variations of working conditions and of workmanship outside our control.

The Process

- Fine diamond honing (**no grinding**)
- Densification and hardening with CARRcrete PROhard
- Diamond polish through to desired gloss
- Apply CARRcrete PROseal impregnating sealer
- Apply CARRcrete PROguard seal coat

The Difference

All InfinityFloor finishes were designed by Dave Carr, a well respected innovator and polisher of concrete for optimum levels of finish and durability. No sales people were used in the creation of this process, only hands on professionals.

InfinityFloor finishes can only be achieved by flooring professionals using machinery, diamond abrasives, chemical hardeners and sealers designed by Dave Carr and manufactured or assembled for Carr Restoration Ltd in the UK.
